Built-in Bluetooth Wireless Technology

The built-in *Bluetooth* Wireless Technology lets you easily stream music from compatible devices such as smartphones, tablets, or personal computers. Enjoy your favourite songs with hassle-free connection.

Bluetooth Auto Reconnect/Bluetooth Wakeup

With the *Bluetooth* Auto Reconnect function, the system automatically reconnects with your *Bluetooth* enabled device after the initial pairing. If you set the system to *Bluetooth* Wakeup, the power will automatically turn on, and the function is switched to *Bluetooth* Audio when you play your *Bluetooth* enabled device.

“P.BASS” Bass Enhancer

The “P.BASS” function emphasises the bass frequencies for a powerful sound. The function is available by default when you first turn the power on, and can be turned off with the remote control.

Sound Equaliser

You can fine-tune the sound to suit your preference using the four equaliser presets.

- Flat: a flat, basic sound
- Active: powerful sound with emphasis on low and high tones
- Dialogue: makes radio or vocal sound more easy to hear
- Night: optimised for listening at a low volume

Auto Standby

No need to worry if you left the power on. The system will automatically switch to standby after being left uncontrolled for a while.
